

species = 220
HYBRID = 230

Parvisepalum

Paph Class

Brachypetalum

species = 221
HYBRID = 231

Pouch thin (with pleats)
Petals wide, dorsal sepal smaller.

Inflorescence very short
Pouch thick, egg-shaped.
Petals wide, leaves mottled.

species = 222
HYBRID = 232

**Barbatum /
Sigmatopetalum**

Sepals striped. Leaves mottled.
Small synsepal. Flowers single.

species = 223
HYBRID = 233

Cochlopetalum

**Petals short, horizontal, and
corkscrew-shaped**
Flowers sequential.

species = 224
HYBRID = 234

**Insigne /
Paphiopedilum**

Sepals not distinctly striped
(with the exception: *Paph. fairrieanum*),
Petals narrow and leaves plain.
Large synsepal. Flowers single.

Paph Class

species = 225
HYBRID = 235

**Coryopetalum &
Pardalopetalum**

Flowers multi-floral
(3 or more flowers
per inflorescence)

Sepals usually striped.
Petals usually long
and downswept.

No species
HYBRID = 236

BULLDOGS

Petals WIDE and leaves plain
Sepals not distinctly striped.
Large synsepal. Flowers single.
Inflorescence intermediate length.

HYBRID = 240

[Hybrids between Subgenera]
Does not fit in other classes.
